

Scalability & Future Plan

Date	05 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-being (HDI)
Maximum Marks	Maximum Marks: 1 Mark

Scalability & Future Plan:

This document outlines how the HDI Prediction System can be scaled to support more users, larger datasets, and additional features in the future. It also presents the roadmap for enhancing the system's performance, security, and usability.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size	May reduce prediction accuracy	High
2	Supports only three input parameters	Limits prediction flexibility	Medium
3	Local deployment only	Limited accessibility for users	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy on cloud with load balancing
2	Data Storage	Local dataset storage	Use cloud database for better stability
3	Performance	Basic ML prediction model	Optimize model and backend processing
4	Security	Basic input validation	Add authentication and secure API access

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 1	Improve ML model accuracy	1 month	Better prediction results
Phase 2	Cloud deployment	2 months	Access from anywhere
Phase 3	Add more development indicators	3 months	More comprehensive HDI analysis
Phase 4	Interactive dashboard and reports	4 months	Better user experience and visualization
