Project Title	A Comprehensive Measure of Well-being
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposed solution aims to improve the understanding and measurement of Human Development Index (HDI) using a simple and intelligent system. It combines health, education, and income indicators to calculate overall well-being, provide meaningful insights, and support better decision-making. Key features include HDI score calculation, data visualization, and personalized recommendations.

Project Overview	
Objective	The primary objective is to develop a system that measures overall well-being using Human Development Index (HDI) indicators and provides meaningful insights to users.
Scope	The project focuses on collecting health, education, and income data, calculating HDI scores, visualizing results, and providing recommendations to improve well-being.
Problem Statement	
Description	Existing well-being information is scattered across multiple sources, making it difficult for users to understand and evaluate their overall Human Development Index.
Impact	Solving this problem improves awareness of well-being, supports informed decision-making, and helps users identify areas that need improvement.
Proposed Solution	
Approach	Develop an HDI-based application that collects user data, calculates the HDI score, displays visual reports, and provides simple recommendations for improving overall well-being.
Key Features	- HDI score calculation - Health, education, and income analysis

	• Graphical reports and dashboards • Personalized recommendations • Progress tracking and data visualization

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Processor specifications	Intel Core i5 / AMD Ryzen 5
Memory	RAM specifications	8 GB RAM
Storage	Disk space for application and data	256 GB SSD
Software		
Frameworks	Python frameworks	Flask
Libraries	Required python libraries	Pandas, numpy, Scikit-learn, matplotlib
Development Environment	IDE	Visual Studio Code, Jupyter Notebook
Data		
Data	Source, size, format	World Bank HDI dataset / UNDP dataset, CSV format
