

Project Executable Files

Date	05 July 2026
Team ID	xxxxxx
Project Name	A Comprehensive Measure of Well-being (HDI)
Maximum Marks	3 Marks

Project Executable Files :

This section includes all executable and deployable files required for the HDI – A Comprehensive Measure of Well-being project. It ensures the evaluator can successfully run and verify the project.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

 app.py	 model.pkl	Trained machine learning model (root level).
 requirements.txt	 requirements.txt	Project dependencies.
 README.md	 README.md	Project documentation.
 dataset.csv	 dataset.csv	Dataset file (root level).
 templates/	 templates/	Contains HTML templates.
 index.html	 index.html	Main HTML page.
 static/	 static/	Static files (CSS, images, etc.).
 css/	 css/	Contains CSS files.
 images/	 images/	Contains image files.
 models/	 models/	Saved machine learning models.
 hdi_model.pkl	 hdi_model.pkl	HDI prediction model.
 data/	 data/	Data files for the project.
 hdi_dataset.csv	 hdi_dataset.csv	HDI dataset used for training/testing.
 screenshots/	 screenshots/	Project screenshots.
 screenshot1.png	 screenshot1.png	Screenshot 1.
 screenshot2.png		

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local host / Not hosted
Login Credentials (Demo)	Not required
Platform / Hosting Provider	Local flask server
Repository Link	
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 4: Run Instructions

✓ **Pre-requisites**

- Python 3.10 or above
- Visual Studio Code (VS Code)
- Flask
- Pandas
- NumPy
- Scikit-learn
- Matplotlib

python

VS Code

Flask

pandas

NumPy

scikit-learn

matplotlib

 **Steps**

- 1

Download or clone the project.
- 2

Open the project folder in Visual Studio Code.
- 3

Install the required dependencies:

pip install -r requirements.txt
- 4

Run the Flask application:

python app.py
- 5

Open a web browser.
- 6

Go to:

http://127.0.0.1:5000/
- 7

Enter the following details:

- Life Expectancy
 - Expected Schooling

Human Development Index Prediction

Life Expectancy (e.g., 72)

Expected Schooling (e.g., 12)

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	prediction depends on input data quality	Use valid input values
2	Supports only selected HDI indicators	Future enhancement planned
3	Requires internet only for dataset updates	offline prediction works normally
